Baby rattle EZ-DO – Finish

Jodi

Locust bowl with inlaid art
Bowl – buttons added for design
Box with painted designs

Ken Deaner

Carved pieces – “Defect” leads to new designs. Ken stated that
90% of the work he did was off the lathe.

Henry Zipperien

Smokin Snowman

DEMONSTRATION

HENRY ZIPPERLEN – “SMOKIN SNOWMAN”

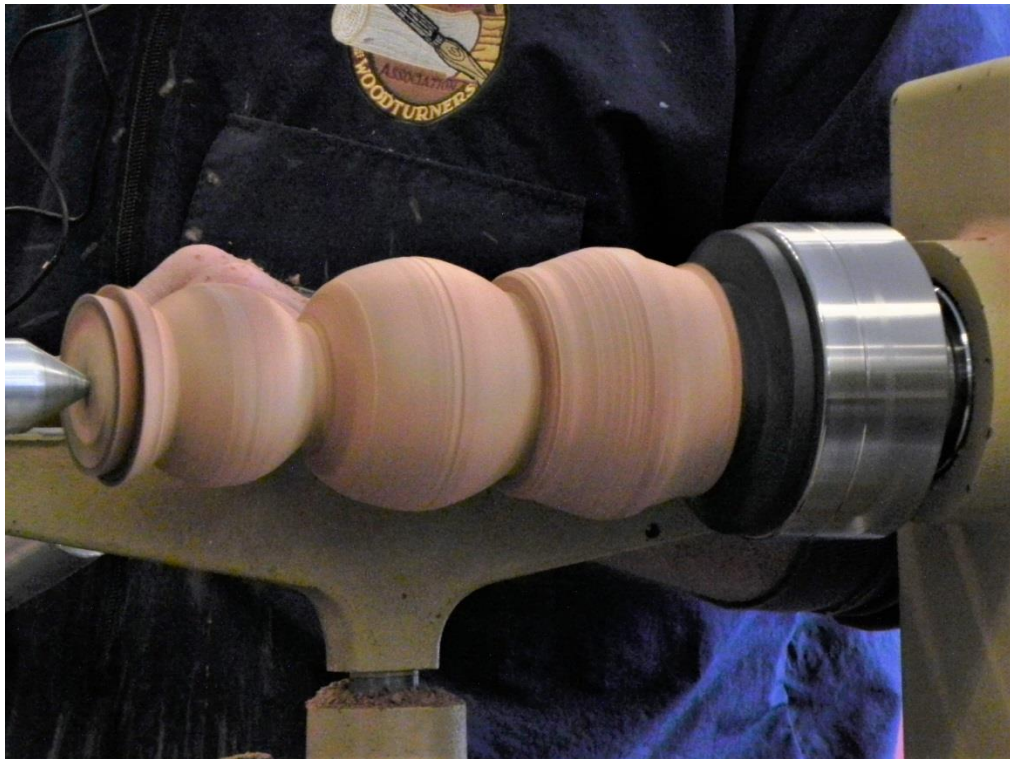

Members in attendance were treated to a demo by Henry Zipperlen. When called upon, Henry rises to the occasion and gives us a well planned demo. Considering the cold spell we were experiencing, a “Smokin Snowman” was quite appropriate and enjoyed.

Henry’s “Hand Out” told the story! If you were not in attendance and would like a copy, please contact Bob Widder @ (516) 672 – 2951. Henry’s print out contains 10 steps and three diagrams with measurements.

The Ten Steps outlined by Henry are:

1. Between centers, turn blank round with a dovetail on both ends
2. Mark and divide the two parts of the Snowman
3. Begin with the top part. Turn to appropriate dimensions

4. Drill 1 ¾ hole 2" deep and an additional ½" hole up the pipe area. (You can't go too deep since he will have a hat on.)
5. The bottom half should be turned to fill the 1 ¾" hole
6. Turn the ridge on the bottom, with will allow air in
7. The two pieces can be reassembled and turned together, to tweak the overall shape
8. The holes drilled up through the body allow air to flow up and feed the incense. I used 3 – ½" holes to keep the incense lite
9. Use a bottle cap to house the incense (cone style)
10. The button and carrot-nose are turned from scrap wood. The eyes are stones (painted black) and the arms are sticks from and Azalea Bush.

Henry prepared the three sections of the Snowman

THANK YOU HENRY.....WE ALL LOOK FORWARD TO YOUR NEXT DEMO
